

# IRIS Eyes™

**A report of a sink hole on a major road was just reported. There are no nearby traffic cameras. But there is an agency maintenance worker nearby.**

**The trapped queue is in an area with no traffic cameras. A traveler has informed you they are at a location that you and your supervisor need to see right now.**

When you need “eyes on the road” IRIS Eyes™ can help.

With three simple clicks, your operation center staff can establish a live video stream from any smartphone, directly to your operations center.

- Your staff can share the viewing link so that several people can view the live stream simultaneously.
- Rewind the video to view earlier parts of the stream.
- Download the video afterward for after action review.

## Remote cameras, everywhere, on demand.

# IRIS Eyes<sup>TM</sup>

## Get live video streams from remote cell phones into your Ops center.
